

*IPA Booklet Series*

**A Brief Development History of Press-in Machinery**

**International Press-in Association**

## **Preface**

This booklet is an edited version of a series of articles entitled “Development History of SILENT PILER” appeared in the IPA Newsletter from Vol.5, No.3 in 2020 September to Vol.6, No.1 in 2021 March, supplemented by a newly written article entitled “Development of Implant Navi”. This booklet provides a history of development of mechanical aspects of press-in machinery over a half century, and a few recent developments related to data collection and processing for press-in piling with a high precision.

Publication of this booklet is a part of IPA 15<sup>th</sup> year anniversary project.

Note: Minor modifications have been applied to the original articles for consistency and readability.

## **Editorial committee**

Chair	Osamu Kusakabe (Executive Director, IPA)
Secretary	Hongjuan He (Secretariate, IPA)
Members	Masaaki Ono (Director, GIKEN LTD.) Yukihiro Ishihara (Manager, GIKEN LTD.) Hiroyuki Yasuoka (Advisor, CITEC INC.)

## **Authors**

Osamu Kusakabe	Chapters 1 & 4
Hongjuan He	Chapters 1 & 4
Masaaki Ono	Chapter 2
Yukihiro Ishihara	Chapter 3 (3.1)
Hiroyuki Yasuoka	Chapter 3 (3.2)

# Contents

<b>Chapter 1</b>	<b>Introductory remarks</b>	01
<b>Chapter 2</b>	<b>Development of Press-in Machinery</b>	05
2.1	The birth of SILENT PILER	05
2.2	Practical use and commercialization	07
2.3	Self-walking function	09
2.4	Automatic operation and optimal design	11
2.5	Model applicable to hard ground	12
2.6	Environmental considerations and IT enabling	14
2.7	Modularization design	17
2.8	Approach to installation considerations and piles	18
2.9	Latest model SMART PILER	19
2.10	Development History of Gyropress Method	20
2.10.1	Birth of Tubular Piler	20
2.10.2	Birth of GYRO PILER	23
2.10.3	Combi-Gyro Method	27
2.10.4	Skip Lock System	28
<b>Chapter 3</b>	<b>Utilization of monitoring data during Press-in piling</b>	31
3.1	Development of PPTS	31
3.1.1	Outline of PPTS	31
3.1.2	Estimation of subsurface information	33
3.1.3	Automatic operation of the press-in machine	35
3.2	Development of Implant Navi	37
3.2.1	Outline of Implant Navi	37
3.2.2	Examples of applications	41
3.2.3	Future prospect of Implant Navi	44
3.2.4	Conclusion	48
<b>Chapter 4</b>	<b>Concluding remarks</b>	49
<b>References</b>		51
